

# Cascading Style Sheets (CSS) Inliner

Sendwithus called for upgrades to their existing CSS Inliner, which is an open source project found on *GitHub.com*. The purpose of the CSS Inliner is to read clients' CSS and reformat it to make it compatible with email applications. The Capstone team will be improving the functionality of the CSS Inliner by including media query formatting, error reporting, and metadata extraction.

## Team Space Monkeys

The Space Monkeys is a solid team which consists of Philip Ma, Derek Paul, and Emrhys Williams. This team has been working with Sendwithus, a company whose primary objective is to send transactional emails for companies to their customers. For example, Sendwithus is responsible for sending automated confirmation emails when making online purchases or registering with a website. They have enlisted the help of the Space Monkeys to upgrade an existing module inside their transactional framework.

**Philip Ma** - Philip contributed to the project as the technical writer and developer. During his downtime, Philip can be found reading news articles on any sports team or watching hockey. He also likes to cook and relax with family and friends. After graduation and upon receiving the Computer System Technology diploma, he hopes to find a job developing applications.

**E-mail:** Philipjma@gmail.com

**Derek Paul** - Derek enriched the project with his presence as the lead developer. He spends his free time lifting weights and being a loving partner and step father. Derek excels at making those around him feel comfortable as he is very approachable. His passion for computers started at a young age and has turned into his main career focus. Derek is hardworking and driven and will make an excellent software developer.

**E-mail:** derekjpaul@gmail.com

**Emrhys Williams** - Emrhys contributed to the project as the project manager and as a developer. When he is not working on the project, he likes to cook, play baseball, and pass the time by playing vinyl records. After he graduates with his Diploma, he would like to find a career helping people in the Greater Victoria area.

**E-mail:** Emrhys.Williams@shaw.ca

## Acknowledgements

We are excited to bring together the skills that we have accumulated while at Camosun to complete this project. We would like to thank the Sendwithus team for sponsoring our project and Camosun College for putting the Capstone program together.
