

# Team Super Script 3

Team Super Script 3 is working on the GAIN Reporting Module project for Cube Global Storage to improve their current inventory management system. This application will enable employees at Cube to produce reports to serve all of their business needs. The project will hopefully prove to be the first of many accomplishments to come.

*"We would like to thank CUBE for sponsoring this project. They have been wonderful to work with." - Team Super Script 3*

## **Nicolaj Bunting**

With a long time affinity for computers, technology, and gaming, Nicolaj came to Camosun to extend his knowledge of programming and computers.

Roles: Programming, UI design, Graphics

## **Michelle Stafford**

Michelle has previously completed a diploma program at The Art Institute for Game Art & Design, but discovered her true passions lie in computer programming. Michelle loves games and technology and would enjoy the opportunity to prove herself as a valuable member of the ever-growing games industry.

Roles: Front End, UI design, Back End, Documentation

## **Thomas Protheroe**

Thomas has been fascinated with programming and system design since high school. He enrolled in the CST program at Camosun to broaden his practical computer knowledge, and enjoys learning new programming languages and technologies.

Roles: Programming, Network Architecture, Project Manager
