Saanich Parks & Rec Mobile App

Introduction

The Saanich Parks and Recreation app development team is focused on creating a user friendly mobile application which facilitates easy access to program listings cross-municipality. This has huge potential in Victoria, as it solves many issues in the current listing system. Some of the issues currently faced include only being able to view one district at a time, different interfaces between these districts, minimal search features and confusing site layouts. The goal is to eliminate these completely with a simple, intuitive and thorough program search registry for mobile devices.

Project Overview

This mobile application will provide users with a way of searching for programs and drop-in classes provided by Saanich as well as other municipalities and view information regarding this programs such as cost, location, and schedule. Users will then be able to click on a link taking them to the municipalities online website where they can then register themselves in the chosen program. Additional features of the app include the ability to view the location the program is offered in Google Maps, and a robust search feature which will enable users to query multiple fields of a program so that they may find exactly what they're looking for.

Our Team:

Austin Edwards is a hard working and extremely motivated individual who doesn't shy away from learning new things. He meets each day with positive energy and seemingly endless passion for what he does.

Scott Curtis is a devoted and hardworking individual who isn't afraid to go the extra mile to ensure his work is the best it can be. He greets new projects with enthusiasm and innovation, showing great passion for his work

Conclusion

We would like to thank our project sponsor, Ron Proskow for providing us with such an amazing opportunity to create a unique and useful app that will see widespread use throughout the community.
