

Team Yellow Penguin has been working with Stonecroft Landscapes(SCL) to implement a website and a database management system(SCLMS). The website aims to improve the company's visibility in order to stay strong and competitive on Vancouver Island. In addition, the website provides an alternative way to serve SCL's customers. The database management system improves the employees' efficiency, helps eliminate paperwork, and automate the current landscaping business system.

Yellow Penguin Team Members

A portrait of Aaron Amurao, a young man with dark hair, smiling.	<p>Aaron Amurao is finishing his second year of the Computer Systems Technology Program at Camosun College. Continuing his education from high school, Aaron has been pursuing his enthusiasm for computers and turning it into a career. He feels very excited to work on this project and to develop his skills in becoming a programmer and database administrator so that he can one day achieve his dream of working for <i>Google</i>.</p> <p>Responsibilities: Project Manager. Software & Web Design, Implementation, Testing, Documentation, Programmer.</p>
A portrait of Mayumi Connor, a woman with dark hair, smiling.	<p>Mayumi Connor is in her final academic term of the Computer Systems Technology program at Camosun College. Going back to school has been very challenging yet great opportunity for her. She feels excited about achieving her goal of earning her diploma. She has a strong background working with databases, and this project has instilled in her the confidence to resume her career in Victoria after graduation.</p> <p>Responsibilities: Design, implementation, testing, documentation of a database management system for its front-end and its back end.</p>
A portrait of Longguang Fan, a woman with dark hair and glasses, smiling.	<p>Longguang Fan is in her second year of the Computer Systems Technology program at Camosun College.
