Greater Victoria Bike To Work Society App

The Greater Victoria Bike to Work Society is working with Team Appsolutely Awesome to create an app that will allow thousands of cyclists in Victoria to contribute to safer cycling by reporting road, safety, and weather conditions on their daily commute. The app will also allow other cyclists to view these reports so they can adjust their own travel as required.

Appsolutely Awesome Team Members

Gyanesh Mishra was born with an inexhaustible desire to explore technology. After finishing his diploma in Computer Systems Technology this year, he is excited to pursue a career in the software industry. He hopes it will be programming, but he also loves working with databases.
Roles: Team Leader, Programmer (making sure everything happens and works).
**Hobbies**: Gaming, volunteering, travelling, and socializing.

Anis Atrchi was a man of many trades before he settled down in the technology sector. His strengths are problem solving and team based projects. Anis hopes to have a long career of cultivating his love of all things technology.
Roles: Co-Programmer, Technical Writer (making sure everything makes sense).
Hobbies: Gaming, technology, reading, travelling, and music.

Calvin was born in Victoria, BC and lived three years in Hong Kong before coming back to his hometown. He started his education in biology and science before changing his path to the Computer Systems Technology program. After learning many valuable skills, he hopes to enter the IT world with great confidence.
Roles: User Tester (making sure nothing breaks).
Hobbies: Cars, movies, games, guitar, and socializing.

Team Appsolutely Awesome would like to thank Camosun College Computer Systems Technology Department and Greater Victoria Bike To Work Society for this amazing opportunity. We hope that our app will help create a more safe and positive cycling environment.
