

Gameboyz | Team Bio

The Gameboyz website is built by Jared, Sam, and Blake with Youneeq's help to integrate their analytical recommendation engine. Rob Wylie (Youneeq) is overseeing the project's development with Mike Lally (Youneeq) as technical consultant. Murray Galbraith (Youneeq) is the project sponsor for Gameboyz and will be approving development stages along with Rob Wylie.

Gameboyz is a news and review video game website that features Youneeq's analytical recommendation engine for content generation. The website will feature written content in the form of news articles, video game reviews and opinion articles. Youneeq will help enhance viewership for Gameboyz by delivering content based on previous history of the user. The user can adjust Youneeq's settings if said user finds Youneeq unsatisfactory.

Jared Smith | Project Master

In order for Gameboyz to be successful, a good Project Manager is needed. Jared is willing to take the leadership role for this project and will make sure Gameboyz is successful. Jared will have a hand in all aspects of the project, making sure the website is a well oiled-machine working in harmony. Jared's role isn't just managing the project and the team; he will also be designing the website's look and feel. Once the project and school term is finished, Jared hopes to start a career in Software Development with focus in Web Technologies.

Roles: Scheduling, Programming, Design, Documentation

Sam Beveridge | Programmer

Sam is a crucial piece in the development of Gameboyz. He will be tackling the most difficult tasks in design and functionality with the guidance of Jared. The focus of these tasks will change throughout development. As an avid gamer and hockey fan, Sam hopes to fully round himself by pursuing a career in Software Development.

Roles: Design, Programming, Recorder

Blake Tessier | Programmer

Blake will be working on the backend of the project. He will be in charge of handling the database as well as dealing with data that will be added to the website. He is also working with the user permissions of the website and the users that will be added later in the development cycle of the site. Blake will be assisting in the marketing and the placement of advertisements.

Roles: Backend development, Programming, Advertisement

Youneeq.ca | Project Sponsor

We would like thank Youneeq for giving us the opportunity to prove and develop our skills in real-world environment. With this opportunity, the experience and knowledge from the project will be absolutely invaluable and will provide a solid basis for our future careers in Software Development and Web Design.
