

MyLevelUp

Project Description

Team E² + V is excited to work with Matthew Riddet, Dale Chan, and Ryan Robillard to strengthen the MyLevelUp mobile application. MyLevelUp uses games to engage children and help them with language development. The objective of this project is to develop more games so that children, parents, and teachers have diverse options that strengthen the impact of learning.

Evan Plant

Evan has been excited about video games since he was very young, and discovered his interest in technology. The ICS program at Camosun has helped him develop a passion for programming and game design. He is interested in exploring artificial intelligence, creative writing, and other areas that will improve his game design skills. Evan plans to head into the video game industry, with the hope of directing his own projects some day.

Victor Baya

Victor has been interested in technology from a young age. His inspiration comes from movies and video games. Seeing all the cool technological advancements in these fields has pushed Victor to pursue opportunities in the tech industry. Victor enjoys problem solving and being creative in art, sports and music. Victor has plans to pursue a career in the video game industry, web development or database management.

Evan Vassiliadis

Evan has always had a passion for computers, but for the majority of his life, he worked in the restaurant industry in order to help his father's business. Evan has realized that was not his true passion, which led him to Camosun. His time in the restaurant industry has gave him valuable experience working under pressure and the ability to interact with various customers. Currently, Evan enjoys Muay Thai kickboxing, lifting weights at the gym, and meditation. He is anticipating using the

knowledge from Camosun to begin his career as a game developer in Vancouver.

E² + V would like to thank Chris Newstead, Jason Cumisky and the rest of the Camosun faculty for providing us with the skills needed to succeed in the industry. We would also like to thank the LevelUpLearning project sponsors and team for providing us with an exciting opportunity.
